For decades the liberal class was a defense against the worst excesses of power. But the pillars of the liberal class -- the press, universities, the labor movement, the Democratic Party, and liberal religious institutions -- have collapsed. In its absence, the poor, the working class, and even the middle class no longer have a champion. In this searing polemic Chris Hedges indicts liberal institutions, including his former employer, the New York Times, who have distorted their basic beliefs in order to support unfettered capitalism, the national security state, globalization, and staggering income inequalities. Hedges argues that the death of the liberal class created a profound vacuum at the heart of American political life. And now speculators, war profiteers, and demagogues -- from militias to the Tea Party -- are filling the void.

"Teaching Character in the Primary Classroom provides an excellent and very accessible overview of the emerging field of character education. It covers, in detail, the theory of character education as well as advice and guidance about how this should be applied in practice in primary schools." Professor James Arthur, University of Birmingham Character matters. As more and more schools are choosing to teach Character Education, trainee and beginning teachers need to know more. What is Character Education? Can it really be taught? How does children's learning benefit from discussions around character in the classroom? How do I teach it? What does good teaching of Character Education look like in the classroom? Teaching Character Education in Primary schools tackles these questions, and many more. This is a practical guide to why and how we can teach character in primary schools. It begins by exploring why character matters and considers what 'character' is and (importantly) what it is not. It goes on to discuss the place for teaching character in primary education and includes practical guidance on how it can be taught. The text also looks at character beyond the classroom, how parents and the wider community can be included in the teaching of character and how outdoor learning and education can contribute. This book is written for all those who are new to teaching character.

The first half provides a thoughtful conceptual framework for reading and understanding teacher research, exploring its history, potential, and relationship to university-based research. In the second half, the voices of teacher researchers contrast, engage, and combine as contributors explore the meaning and significance of their approaches and findings. These authors enter into the "national conversation about school reform, teacher professionalism, multicultural curriculum and pedagogy, and language and literacy education."

Reading and Writing

The "Models for Writing" books provide a complete programme to teach the writing process through

Topics include the ways in which mask artists and performers maintain a sense of universality despite varying local customs; the legacies of Italian mask makers Amleto and Donato Sartori and of the California-based Dell'Arte International School of Physical Theatre; and the ways in which traditional approaches in mask artistry continue to influence commercial mask performance ventures in film, on Broadway, and in touring companies.
